

Sinclair's corporate decision to require their stations to air the anti-Kerry documentary and bill it as "news" -- without giving equal time to the democratic point of view -- is a flagrant abuse of their use of public airwaves. Our founding fathers were well aware that without freedom in the media, democracy becomes an endangered species.

Sinclair is obligated, by law to serve the public interest -- and not just the segment of the public that agrees with their views. Please act to prevent this corporate attack on our nation's media freedom.
